

## Veeam Backup for Microsoft Office 365

# Protect your Office 365 backups in Microsoft Azure

### Never lose access to your email

All too often, IT professionals wrongly assume that since Microsoft Office 365 already resides in the cloud, there is no need to have a backup of their data. Although Microsoft provides Service Level Agreements (SLAs) to keep Office 365 mailboxes up and running, it is still your data and your responsibility to protect it.

Veeam® Backup for Microsoft Office 365 enables IT professionals to backup email data to anywhere, including an on-premises location or into a Microsoft Azure virtual machine. Allowing for quick recovery of individual mailbox items with enterprise-class granularity and efficient eDiscovery of email items.

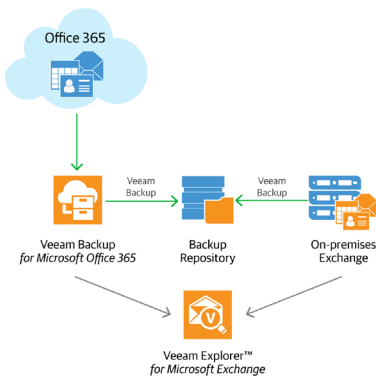

### Choose your Office 365 repository

The volume of email data is growing exponentially, and with that growth, many organizations are looking for ways to leverage the scalability and cost-effectiveness of the Microsoft Azure public cloud. Veeam Backup for Microsoft Office 365 enables businesses to choose the backup location that best meets their needs from on-premises to off-site public-cloud storage.

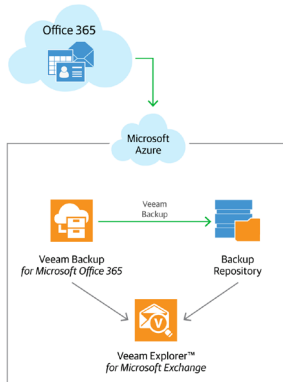

Regardless of your backup repository, with Veeam Backup for Microsoft Office 365, you can:

- Take control of your organization's Office 365 data
- Reduce the time and effort needed to find and restore email data
- Protect against data loss scenarios that are not covered by Microsoft

Veeam Backup for Microsoft Office 365 to on-premises location

Veeam Backup for Microsoft Office 365 to Microsoft Azure

Flexible restore options

### Total access, control and protection of Office 365 email data

#### Meet compliance requirements

With an Office 365 backup, you can keep your email data as long as you need, and store data based on long-term retention policies for regulatory or compliance needs.

With granular advanced search and find functionality, you can ensure you recover exactly what you need, not more than you need.

#### Efficiently scale and minimize overhead

Unmatched scalability with a multi-repository, multi-tenant architecture, comprehensive automation with full PowerShell and RESTful API support.

#### Unified Exchange and Office 365 backup

Veeam Backup for Microsoft Office 365 can also be installed locally to protect hybrid-cloud email deployments as well as migrate mailbox data between Office 365 and on-premises Exchange.

"Veeam Backup for Microsoft Office 365 has provided us with lightning fast, low latency, high bandwidth backup capabilities at regular intervals when utilized on an Azure virtual machine."

Alasdair Thomson  
IT Director  
College Success Foundation

## Backup Microsoft Office 365

You need to securely backup Office 365 email data to another location for a variety of reasons, including the ability to facilitate eDiscovery and to meet internal policies and compliance requirements. The most important reason being to mitigate risk and have the peace-of-mind that you'll be able to restore your users' data when needed!

With Veeam Backup *for Microsoft Office 365*, you can retrieve Office 365 Exchange Online mailbox items (email, calendar and contacts\*) from a cloud based instance of Office 365 and uniquely backup this mailbox data into the same format that Microsoft Exchange uses natively – an archive database based on Extensible Storage Engine (ESE), also known as the Jet Blue database.

## Restore Office 365 email, calendars and contacts

Never settle for less than fast, efficient restore of Office 365 mailbox items for granular recovery.

Built-in Veeam Explorer™ *for Microsoft Exchange* allows for quick search and recovery of individual mailbox items. Mailbox items can be restored directly to an Office 365 mailbox, an on-premises Exchange mailbox, saved as a file, emailed as an attachment or exported as a PST.

## eDiscovery of Office 365 email

Without a copy of your data, retrieving emails for regulatory or compliance reasons can be costly and time consuming, and can ultimately present a major disruption to normal business operations.

But, not with Veeam! You can leverage the familiar, advanced search capabilities and the flexible recovery and export options of Veeam Explorer *for Microsoft Exchange* to perform eDiscovery on Office 365 email items – just as easily as you would with an on-premises Exchange server backup.

\*SharePoint Online and OneDrive for Business support is coming soon in Veeam Backup *for Microsoft Office 365* v2!

"With Veeam Backup for Microsoft Office 365, we can take back control of our mailboxes. We can have our own off-site repository for safe keeping and we can recover lost emails with ease."

Gary Meers  
Chief Technology Officer  
saberVox

### Scalable & flexible backup

A multi-repository, multi-tenant architecture enabling protection of larger Office 365 deployments with a single installation, while also empowering service providers to deliver Office 365 backup services.

### Powerful automation

Comprehensive automation with full PowerShell and RESTful API support for all.

### Expanded platform support

Including protection of Public Folders, deeper integration for hybrid email deployments, and extended support to include Office 365 U.S. Government (DoD and non-DoD), Office 365 Germany and Office 365 China.
